

- rotate 5 parameter 297
- size 30k parameter 297
- used, for logfile management 296, 297
- weekly parameter 297

**look command 99**

**loopback disk images**

- mounting, with partitions 126, 127

**loopback files**

- about 106
- changes, flushing with sync command 127
- ISO files, mounting 127
- partitions, creating inside images 126
- using 124, 125

**losetup command 126**

**ls -lS command 112**

**Lynx**

- about 187
- working 195

**lynx command 187**

**lzma command 229**

## M

**man-in-the-middle attack 258**

**mathematical comparisons**

- performing 49

**maximum download size, for cURL**

- specifying 191

**md5sum checksum**

- about 78-82
- computing 78
- syntax 78

**md5sum command 102**

**messages**

- sending, to user terminals 327, 329

**minified JS 170**

**mkdir command 125**

**mkfs command 124**

**mkfts.ext4 command 125**

**mkisofs command 128**

**mktemp command**

- about 89
- temporary file, creating 89
- working 90

**mount command 106, 125**

**mountpoint 124, 125**

**multiple commands**

- combining 40

**multiple files**

- merging, as columns 173

**multiple tar files**

- concatenating 220

**multiple terminals**

- managing, from one 348, 349

**MySQL database**

- about 335
- reading, from Bash 335-339
- writing, to Bash 335-339

## N

**n characters**

- reading, without return key 43

**netcat command**

- used, for creating arbitrary sockets 274

**netstat command 273**

**network**

- setting up 244

**Network Address Translation (NAT)**

- setting up 275

**networking 243**

**networking parameters**

- host names 243
- ports 243
- route 243
- subnet mask 243

**network interface 244**

**network ports 271, 272**

**network setup**

- arbitrary sockets, creating 274
- commands, running on remote host with SSH 257
- DNS 247
- domain names 247
- files, transferring through network 261
- firewall, iptables used 276
- hardware address, spoofing 246
- Internet connection, sharing 275
- IP addresses, displaying with ifconfig command 246
- live machines, listing on network 254
- network interfaces list, printing 245

- network traffic 271
- password-less auto-login, with SSH 267
- performing 244, 245
- ping command 250
- port analysis 271
- port forwarding, with SSH 269
- remote drive, mounting at local mount point 270
- routing table information, displaying 249
- wireless network, connecting to 265

**non-interactive port forward 270**

**nth word or column, in file**

- printing 174

## O

**OAuth 201**

**opened port**

- listing 273

**others, file permissions 115**

**output, multiple commands**

- reading 40, 41

## P

**parameter operations 181**

**partimage 240**

**passwd command 343**

**paste command 173**

**patch command**

- used, for patching difference file 130

**patch file**

- about 130

- changes, reverting 132

- generating 131

**PATH environment variable 15**

**pattern**

- replacing, with text in all files in directory 180

**pbzip2 command**

- used, for archiving 231

- working 232

**pbzip2 command, features**

- compression ratio, specifying 232

- number of CPUs, specifying 232

**pcpu command 316**

**pgrep command 13, 318, 319**

**PHP 184**

**PID 314**

**ping command**

- about 250

- used, for checking the connectivity of hosts 250

- used, for listing live machines on network 254, 256

- using 250, 251

**ping command, functionalities**

- echo packets, limiting 252

- return status 252

- Round Trip Time (RTT), finding 252

**pkill command 326**

**popd command**

- about 136

- used, for directory switching 137

- using 137

**port analysis 271, 272**

**port forwarding**

- about 269

- SSH, used 269

**POST request 214**

**power consumption**

- measuring, powertop command used 308

- optimizing, powertop command used 308, 309

**powertop command**

- used, for measuring power consumption 308, 309

**prepend() function**

- defining 17

- working 18

**printf command 11**

**printf() function 165**

**processes**

- about 314

- environment variables, displaying for 321, 322

- killing 324, 325

**process ID. *See* PID**

- finding 318, 319

**process manipulation commands**

- pgrep 318, 319

- ps 317, 318

- top 317
