

subshell
about 42
quoting, for preserving spacing and newline character 42
subshell method 41
symbolic links
about 120
handling 120
target path, reading 121
working 121
syslinux package
downloading 129
syslog 297
syslogd
about 297
used, for logging info from shell script 297-299
system information
obtaining 329, 330

T

tac command 176
tail command 132
Tape ARchives 218
tar command
about 218
features 219
stdin 220
stdout 220
used, for creating archives 218
working 219
tar command, features
files and folders, extracting from archives 220
files, appending to archives 219
files, comparing in archive and file system 222
files, deleting from archive 222
file set, excluding from archiving 223
files, updating with timestamp check 221
multiple tar files, concatenating 220
tar archive, compressing 222
total bytes, printing 224
version control directories, excluding 224
TCP/IP 243
temporary file
creating, mktemp command used 89

terminal
about 10
printing 11
screenshots, taking from 347
working 12
terminal session
recording, with script and scriptreplay 57
terminal settings
collecting 31
manipulating 31
tests
performing 48, 49
text
searching, in file with grep command 147-150
slicing 181
text, between line numbers or patterns
printing 175
time command
parameters 287
used, for calculating command execution time 285-287
working 287
TO_init function 206
top command 317
touch command
about 119
used, for generating blank files in bulk 119
traceroute command 253
translate 73
trap command 326
tr command
about 73
character classes 77
characters, deleting 75
character set, complementing 75
characters, squeezing 76
translation, performing 74
working 74
tree command 139, 140
TTY filter, for ps command 320
TTY(Tele TYpewriter) 288
Twitter
about 201
used, for reading tweets on timeline 201-206
TwitterOAuth.sh library 206

U

UID value 17

uniq command

about 83, 87, 88

working 85

Unix time 32

until loop 47

URLs

parsing, from text 177, 178

usage() function 342

useradd command 342

user administration script 340-343

user agent string

setting, with cURL 190

user, file permissions 114

user logins

monitoring, for intruder detection 299-303

usermod command 343

user terminals

messages, sending to 327-329

V

var 14

variables

about 13

bash prompt string, modifying 17

environment variables 13

length, finding 16

shell variable, identifying 16

super user, checking 17

working with 13-15

version control based backup

Git used 237-240

W

wall command 327

watch command

differences, highlighting 294

used, for monitoring command output 293

wc command

used, for counting characters 138

used, for counting lines 138

used, for counting words 138

Web 184

Web backend

used, for creating define utility 206-209

web page

accessing, with HTTP or FTP authentication 187

downloading, as plain text 187

downloading, wget command used 184, 185

posting to 214, 215

response, reading 214, 215

Web photo album generator

about 198

working 200, 201

website

broken links, identifying 209-211

changes, tracking 211, 213

data, parsing from 194

WEP (Wired Equivalent Privacy) 265

wget command

about 184

download, resuming 186

download speed, restricting 185

used, for downloading web page 184

website, copying 186

whatis command 323

whereis command 323

which command 322, 323

while loop 47, 197

Wi-Fi Protected Access2 (WPA2) 267

wireless network connection

performing 265, 266, 267

word count 138

words, files

about 168

counting, wc command used 138

X

xargs command

about 68

C program files, counting 72

formatted arguments, passing 70
