

associative arrays

- about 28
- defining 28, 29
- using 27, 28

asymmetric keys 267

auto-login

- SSH keys used 267

automatic authentication

- setting up, SSH keys used 267, 268

awk command

- command output, reading 167
- delimiter, setting for fields 167
- external variable. passing to 165
- for loop, using 167
- line, reading explicitly 166
- lines, filtering 166
- special variables 164
- string manipulation functions 168
- used, for advanced text processing 162, 163
- working 162

awk utility 335

B

back quotes 41

back tick 41

bandwidth limit

- specifying, on cURL 191

base64 command 82

Bash

- MySQL database, reading from 335-339
- MySQL database, writing to 335-339

Bash (Bourne Again Shell) 8

bash-oauth library

- downloading 201

bash prompt string

- modifying 17

bc 20

BEGIN block 163

blank files

- generating, in bulk 119

boot failures, machine

- obtaining 290

boot logs, machine

- obtaining 289, 290

broken links, website

- identifying 209-211

bzip2 command 228

C

cat command

- about 54
- data, concatenating with 54
- extra blank lines, removing 55
- general syntax 54
- line numbers 56
- tabs, displaying as ^I 56
- working 54, 55

cd command 42

cdrecord command

- used, for burning ISO 129

CD-ROM tray 129

chage command 343

chain 277

changes, website

- tracking 211, 213

character classes, tr command

- alnum 77
- alpha 77
- cntrl 77
- digit 77
- graph 77
- lower 77
- print 77
- punct 77
- space 77
- upper 77
- xdigit 77

characters, files

- counting, wc command used 138

chattr command

- used, for making file immutable 119

checksums

- about 77, 80
- calculating 78
- computing 78
- for directories 80

checksum verification 79

chmod command

- about 115
- using, for setting file permissions 115

chsh command 343

colored output

- printing 12

command execution time

- calculating, time command used 285-287
- real time 287
- sys time 287
- user time 287

command line

- Gmail e-mails, accessing from 192

command-line navigation

- pushd and popd command used 136

command-line options, comm command 110**command outputs**

- monitoring, watch command used 293

commands

- delay, adding 45
- executing on remote host, with SSH 257-259
- executing rapidly 102, 103
- faster approach 45
- running 44
- running, at system boot 334

Comma Separated Values (CSV) 45, 335**comm command 107, 316****comparisons**

- about 48
- mathematical comparisons, performing 49
- string comparisons, performing 50

compression command 171**Content-length parameter 191****convert command 344****Coordinated Universal Time (UTC) 34****cpio command**

- about 224
- used, for archiving 224, 225
- working 225

CPU 291**CPU usage**

- monitoring, ps command used 291-293

cron

- scheduling with 331-333

cron scheduling utility 331**crontab command**

- about 331
- environment variables, specifying 333
- specific commands, running at system boot 334

cron table 331

- removing 334
- viewing 334

crypt command 81**cryptographic tools**

- base64 82
- crypt command 81
- gpg 81
- md5sum 82
- SHA-1 82
- shadow-like salted hash 83

csplit 91, 92**cURL**

- about 188
- authentication 191
- bandwidth limit, specifying 191
- cookies, storing 190
- downloads, resuming 189
- features 188
- maximum download size, specifying 191
- referer string, setting 189
- response headers, printing 191
- tasks 188
- user agent string, setting 190
- working 189

curl command 188**custom echo script**

- writing 70

custom file descriptors 26, 27**cut command**

- range of characters, specifying as fields 156, 157
- used, for cutting file column-wise 154-156

D**data**

- backing up, rsync command used 234-236
- compressing, gzip used 226
- concatenating, with cat command 54
- parsing, from website 194

date format 34**dates and time delays**

- working with 32-34

dd command 106**decompression command 172****define utility**

- code 208
- creating, Web backend used 206-208
- working 209
