

## **FTP**

- about 261
- automated FTP transfer 262, 263
- connecting to 261
- recursive copying, with SCP 264
- rsync command 263
- SCP 264
- SFTP 263
- using 261

## **FTP authentication, cURL 191**

### **functions**

- defining 37, 38
- exporting 39

## **G**

### **gateway 249**

### **gedit 13**

### **GET request 214**

### **Git**

- about 237
- used, for version control based backup 237-240

### **Gmail 192**

### **Gmail e-mails**

- accessing, from command line 192, 193

### **GNU/Linux ecosystem 313**

### **GNU screen 348**

### **gpg command 81**

### **grep command**

- about 148
- files, excluding in search 151
- files, including in search 151
- files, searching recursively 150
- lines, printing 153, 154
- multiple patterns, matching 151
- silent output 152, 153
- using 148
- using with xargs with zero-byte suffix 152

### **group, file permissions 115**

### **gzip command**

- about 226
- used, for compressing data 226

### **gzip command, features**

- bzip2, using 228
- compression ratio, specifying 228

- gzipped tarball, creating 227

- lzma using 229

### **gzipped tarball**

- creating 227

## **H**

### **hardware address**

- spoofing 246

### **head and tail commands**

- used, for printing last or first 10 lines 132-134

### **head command 133**

### **HTML output, directory tree 140**

### **HTTP authentication, cURL 191**

### **HTTP or FTP authentication**

- used, for accessing web pages 187

### **HTTP protocol 184**

### **HTTP\_PROXY 15**

### **hybrid ISO**

- creating 128

## **I**

### **ifconfig command**

- about 244
- used, for displaying network interfaces 244

### **IFS**

- about 45, 339
- example 46
- using 46

### **image**

- format, converting 344-347
- resizing 344-346

### **Image crawlers**

- about 195
- working 196, 197

### **image downloader 196**

### **Imagemagick**

- about 344
- URL 344

### **import command 348**

### **information, about processes**

- gathering, ps command used 314, 315

### **inotifywait command**

- used, for monitoring file and directory access 294

- working 295
- interactive input**
  - automating 99, 100
- internal field separator** 69. *See* IFS
- Internet connection**
  - sharing 275
- Internet Control Message Protocol (ICMP)**
  - echo packets 250
- Internet Explorer (IE)** 190
- intersection operation, text files**
  - about 107
  - performing 109
- intruder\_detect.sh script**
  - writing 299, 302
- iostat command**
  - used, for monitoring disk activity 309, 310
- IP addresses**
  - displaying 246
- iptables**
  - using 276
  - working 277
- ISO files**
  - about 127
  - burning, from command line 129
  - creating 127
- isohybrid command**
  - used, for converting ISO files to hybrid ISOs 129
- ISO image**
  - creating 127
- iwconfig command** 266
  - using 275

## J

- JavaScript**
  - compressing 170, 171
  - decompressing 170, 171

## K

- killall command** 325
- kill command** 324, 325
- Konsole** 348
- kpartx** 126

## L

- last command**
  - obtaining 290
- last in first out (LIFO)** 136
- Last-Modified parameter** 191
- last or first 10 lines**
  - about 135
  - working 136
- let command** 19
- lines, files**
  - counting, wc command used 138
  - printing, in reverse order 176, 177
- Lines of Code (LOC)** 72
- Linux**
  - disk usage, calculating with df and du 280
- live machines**
  - listing, on network 254, 255
  - listing, on network with fping command 255
  - listing, on network with ping command 254
- load average command** 323
- local mount point**
  - remote drive, mounting 270
- LOC (Lines of Code)** 138
- log events**
  - access 295
  - attrib 295
  - close 295
  - create 295
  - delete 295
  - modify 295
  - move 295
  - open 295
- logfile management**
  - performing, logrotate command used 296, 297
- logfiles**
  - writing into 298
- logged in users information**
  - obtaining 288, 289
- logrotate command**
  - compress parameter 297
  - create 0600 root root parameter 297
  - missingok parameter 297
  - notifempty parameter 297
